

Report Grabber Secure

Report Grabber Secure provides the capability to collect data from up to eight devices configured to automatically transmit serial data or reports.

Report Grabber Secure is a simple, intuitive program that allows you to easily collect data from any RS232 serial device and save it to disk files on your local or network drive.

Report files are saved in a non-ASCII format that cannot be easily manipulated. Once saved in the secure format, report files can be exported as text files. The exported text files can be edited, but the integrity of the original secure files remains intact.

Features:

- Supports up to 8 serial connections
- Date & Time stamping
- Saves to disk on each incoming line of data to avoid data loss due to power outage
- Maintains integrity of original data files
